(Chapter 4) (Basic Geometrical Ideas) (Practice Test - 6)

(Class VI)

Time Allowed: 1 Hour 15 Minutes

Maximum Marks: 25

General Instructions:

- This question paper contains four sections – A, B, C, and D. Each part is compulsory.
- Section – A has 5 MCQ of one mark each.
- Section – B has 3 questions of two marks each.
- Section – C has 3 questions of three marks each.
- Section – D has 2 questions of five marks each, attempt any 1 out of 2.
- There is no negative marking.

Section – A

1. Mark three points P, Q and R in your note book and draw a line passing through the points. How many lines can you draw passing through both the points?
(A) 0 (B) 1 (C) 2 (D) 3
2. Can 150 points be coplanar?
(A) Yes (B) No (C) Undetermined
3. Two lines in a plane always intersect in a point.
(A) True (B) False (C) Undetermined
4. Any plane through a vertical line is vertical.
(A) True (B) False (C) Undetermined
5. Any plane through a horizontal line is horizontal.
(A) True (B) False (C) Undetermined

Section – B

6. Illustrate, if possible, each one of the following with a rough diagram:

A closed curve that is not a polygon

7. Name the angles in the given figure.

8. A quadrilateral having all sides equal is called

Section – C

9. Draw rough diagrams of two angles such that they have.

- (i) One point in common
- (ii) Two points in common
- (iii) Three points in common

10. (i) A triangle having all sides of different length is known as
(ii) A triangle whose one angle is more than 90° is called

(Chapter 4) (Basic Geometrical Ideas) (Practice Test - 6)

(Class VI)

11. Draw a circle with centre O and radius 5 cm. Mark points P, Q, R such that

- (i) P lies on the circle
- (ii) Q lies in the interior of the circle
- (iii) R lies in the exterior of the circle

Section - D

12. Draw any circle and mark.

- (i) its centre
- (ii) a radius
- (iii) a diameter
- (iv) a sector
- (v) a segment

13. In Figure, A, B, C and D are four points, and no three points are collinear. AC and BD intersect at O. There are eight triangles that you can observe. Name all the triangles.

(Chapter 4) (Basic Geometrical Ideas) (Practice Test - 6)

(Class VI)

Answers

Section - A

1. 1
2. Yes
3. False
4. True
5. True

Section - B

6.

7. $\angle DAB$, $\angle ABC$, $\angle BCD$ and $\angle CDA$

8. Rhombus

Section - C

9.

10. (i) scalene triangle
(ii) An obtuse triangle

11.

Section - D

12. (i) The centre of the circle is O.
(ii) The radius is OC
(iii) A diameter is \overline{AB}
(iv) A sector is AOC
(v) A segment is DE

13. $\triangle ABC$, $\triangle ABD$, $\triangle ABO$, $\triangle BCO$, $\triangle DCO$, $\triangle AOD$, $\triangle ACD$ and $\triangle BCD$.
