(Chapter - 6) (Integers) (Practice Test 6)

(Class VI)

Time: 1 Hour 15 Minutes

M. M: 25

General Instructions:

- This question paper contains four sections: A, B, C and D. Each part is compulsory.
- Section A has 5 MCQ of one mark each.
- Section B has 3 questions of two marks each.
- Section C has 3 questions of three marks each.
- Section D has 5 questions of five marks each, attempt any 1 out of 2.
- There is no negative marking.

Section - A

- Value of $-45 + 30$ is:
(A) 75 (B) 30 (C) -15 (D) None of these
- The integer is 4 times more than -5 :
(A) 1 (B) 9 (C) -1 (D) none of these
- Write the number with appropriate signs: 30°C above 0°C temperature.
(A) -30 (B) 20 (C) 30 (D) none of these
- Write the number with appropriate signs: 150 m below sea level.
(A) -150 (B) 150 (C) 200 (D) None of these
- Value of $-15 - 16$ is:
(A) -31 (B) 37 (C) 40 (D) -40

Section - B

- Write five integers which are less than -100 but greater than -150 .
- Write four pairs of integers which are at the same distance from 2 on the number line.
- Write six distinct integers whose sum is 7.

Section - C

- The sum of two integers is 30. If one of the integers is -42 , then find the other.
- Sum of two integers is -80 . If one of the integers is -90 , then find the other.
- If we are at 8 on the number line, in which direction should we move to reach the integer
(a) -5 (b) 11 (c) 0?

Section - D

- Use number line and add the following integers:
(a) $9 + (-6)$
(b) $5 + (-11)$
(c) $(-1) + (-7)$
(d) $(-5) + 10$
(e) $(-1) + (-2) + (-3)$
(f) $(-2) + 8 + (-4)$

(Chapter - 6) (Integers) (Practice Test 6)

(Class VI)

13. Draw a number line and answer the following:

- (a) Draw a number line will we reach if we move 4 numbers to the right of -2 .
- (b) Which number will we reach if we move 5 numbers to the left of 1.
- (c) If we are at -8 on the number line, in which direction should we move to reach -13 ?
- (d) If we are at -6 on the number line, in which direction should we move to reach -1 ?

(Chapter - 6) (Integers) (Practice Test 6)

(Class VI)

Answers

Section - A

1. -15
2. -1
3. 30
4. -150
5. -31

Section - B

6. Five integers which are less than -100 but greater than -150 are -110, -111, -120, -130, and 131 respectively.
7. Four pairs of integers which are at the same distance from 2 on the number line are (1,3), (-1, 5), (-2,6), (-3,7) respectively.
8. Six distinct integers whose sum is 7 are 1, -1, 2, -2, 3, 4 respectively. If we add these integers as $1 - 1 + 2 - 2 + 3 + 4 = 7$, the resultant sum is 7.

Section-C

9. let other integer be x and from given condition we have:

$$x + (-42) = 30 \text{ Now, } x = 72$$

So, another integer is 72 respectively.

10. let other integer be x and from given condition we have:

$$x + (-90) = -80 \text{ now, } x = 10$$

So, another integer is 10 respectively.

11. (a) If we are at 8 on the number line then we should move towards left direction on the number line to reach the integer 5.
(b) If we are at 8 on the number line then we should move towards right direction on the number line to reach the integer 11.
(c) If we are at 8 on the number line then we should move towards left direction on the number line to reach the integer 0.

Section - D

12. (a) $9 + (-6) = 3$

- (b) $5 + (-11) = -6$

(Chapter - 6) (Integers) (Practice Test 6)

(Class VI)

(c) $(-1) + (-7) = -8$

(d) $(-5) + 10 = 5$

(e) $(-1) + (-2) + (-3) = -6$

(f) $(-2) + 8 + (-4) = 2$

13. (a)

(b)

(c) On left side

(d) On right side
