

Our Wondrous World

Practice Sample Paper – 2

(Session 2026–27)

(Class 5 EVS)

Time: 2 Hours

Maximum Marks: 50

General Instructions:

1. All questions are compulsory.
2. There are five sections viz. Section -A, Section -B, Section -C, Section -D and Section -E.
3. The number of marks carried by each question is indicated against it.

Section-A

1. Read the given paragraph and tick the correct answer of the given questions. [2×5=10]

The Godavari is one of the important rivers of India. It begins at Trimbakeshwar in Maharashtra and flows across the land before joining the Bay of Bengal. As it travels, smaller streams called tributaries join it. Rivers provide water for people, plants and animals and support many kinds of life. They also become polluted when waste and dirty water are allowed to enter them.

i. Where does the Godavari begin its journey?

- | | |
|------------|---------------------------------|
| a. Gujarat | b. Trimbakeshwar in Maharashtra |
| c. Assam | d. Delhi |

ii. What are the smaller streams joining a river called?

- | | |
|-----------|----------------|
| a. Deltas | b. Tributaries |
| c. Canals | d. Dams |

iii. The Godavari finally joins the _____.

- | | |
|------------------|-----------------|
| a. Arabian Sea | b. Indian Ocean |
| c. Bay of Bengal | d. Red Sea |

iv. Which of the following can pollute a river?

- | | |
|--------------------------|--------------|
| a. Clean rainwater | b. Trees |
| c. Waste and dirty water | d. Fresh air |

v. Rivers are important because they _____.

- | | |
|----------------------|-------------------------|
| a. support life | b. make all water salty |
| c. stop all rainfall | d. remove forests |

Section-B

2. Answer these questions in one word.

[5×1 = 5]

i. Name the solid form of water.

ii. Name the method of preserving food by removing moisture.

iii. Which teeth are used for cutting food?

iv. What is the name of the digital payment system mentioned in the chapter as the world's largest?

v. Name the national bird of India.

Section-C

3. Fill in the blanks (Any 5)

[5×1 = 5]

evaporation, microbes, Ashoka Chakra, freshwater, recyclers, reservoir

- The change of water into water vapour due to heat is called _____.
- Tiny organisms that can make food spoil are called _____.
- The blue wheel in the centre of the Indian National Flag is the _____.
- Water fit for drinking is called _____.
- People who collect useful waste items for further processing are called _____.
- A large water storage area formed behind a dam is called a _____.

4. State whether these statements are True/False.

[5×1 = 5]

- Water exists in solid, liquid and vapour forms.
- Tributaries are smaller streams that join a river.
- Drying food increases its moisture and makes it spoil faster.
- Trees can provide shade and help keep the surroundings cool.
- India has many languages and cultural traditions.

5. Match the following

[5×1 = 5]

Column A	Column B
i. Snow	a. National bird
ii. Tributary	b. Removal of moisture
iii. Drying	c. Clean, safe and caring school
iv. Green school	d. Solid form of water
v. Peacock	e. Smaller stream joining a river

Section-D

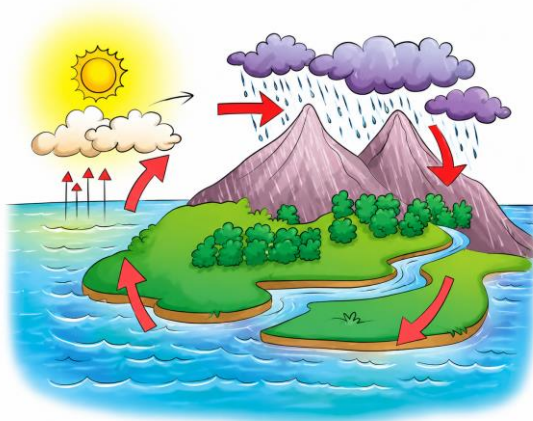

6. Answer the following questions.

[4]

- Why does most of the water on Earth not directly serve as drinking water or water for farming? [2]
- Write any two things you can do to make your school cleaner and greener. [2]

7. Observe the picture and answer the questions.

[4]

- What happens to water when the Sun heats it? [2]
- What happens when water vapour cools and forms droplets? [2]

Section-E

- 8. i.** Explain any three methods used to preserve food. Give one suitable example for each method. **[3]**
- ii.** Why is it important to chew food properly? Name the three types of teeth used for cutting, tearing and grinding food. **[3]**

OR
