(Chapter – 3) (Coordinate Geometry)(Exemplar Problems)

(Class – IX)

Exercise 3.1

Write the correct answer in each of the following:

Question 8:

A point both of whose coordinates are negative will lie in

(A) I quadrant

(B) II quadrant

(C) III quadrant

(D) IV quadrant

Answer 8:

(C) III quadrant

Solution:

A point both of whose coordinates are negative will lie in III quadrant because, in III quadrant x-coordinate and y-coordinate both are negative.
