Exercise 13.1

Choose the correct answer from the given four options:

Question 5:

The abscissa of the point of intersection of the less than type and of the more than type cumulative frequency curves of a grouped data gives its

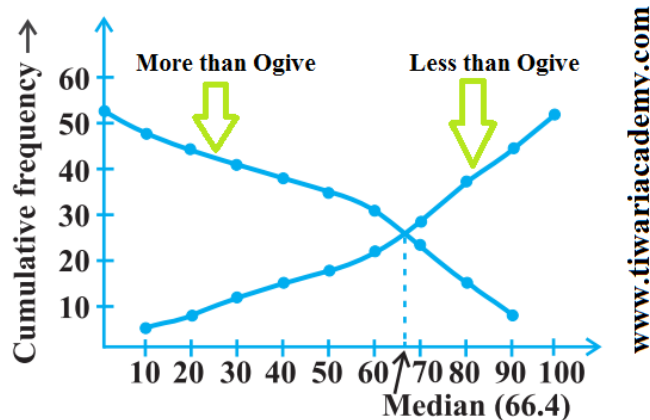

- (A) mean (B) median (C) mode (D) All of these

Answer 5:

- (B) median

Solution:

Since, the intersection point of less than ogive and more than ogive gives the median on the abscissa.

Hence, the option (B) is correct.
