Exercises

Question 1:

Correct the following statements and rewrite them in your notebook.

- (a) Stem absorbs water and minerals from the soil.
- (b) Leaves hold the plant upright.
- (c) Roots conduct water to the leaves.
- (d) The number of petals and sepals in a flower is always equal.
- (e) If the sepals of a flower are joined together, its petals are also joined together.
- (f) If the petals of a flower are joined together, then the pistil is joined to the petal.

Answer 1:

- (a) *Roots* absorbs water and minerals from the soil.
- (b) *Stem* hold the plant upright.
- (c) *Stem* conduct water to the leaves.
- (d) The number of petals and sepals in a flower is *not* always equal.
- (e) If the sepals of a flower are joined together, its petals are *separate and not* joined together.
- (f) If the petals of a flower are joined together, then the pistil is *not necessarily* joined to the petal.

Question 2:

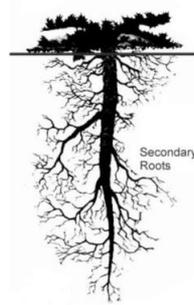

Draw (a) a leaf, (b) a taproot and (c) a flower, you have studied for Table 7.3.

Answer 2:

www.tiwariacademy.com

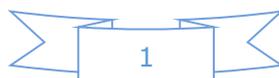

(a) A Leaf

(b) A taproot

(c) A flower
