(Chapter – 4) (Linear Equations in two Variables)(Exemplar Problems)
(Class – IX)

Exercise 4.1

Write the correct answer in each of the following:

Question 18:

The point of the form (a, a) always lies on:

- (A) x – axis (B) y – axis
(C) On the line $y = x$ (D) On the line $x + y = 0$

Answer 18:

- (C) On the line $y = x$

Solution:

If the value of x is equal to value of y . The point of the form (a, a) always lies on the line $y = x$.
