(Chapter – 4) (Linear Equations in two Variables)(Exemplar Problems)
(Class – IX)

Exercise 4.2

Write whether the following statements are True or False? Justify your answers:

Question 4:

The graph given below represents the linear equation $x = 3$.

Answer 4:

True

Justification:

The given equation is $x = 3$.

All the points on the graph are satisfying this equation.

Also the graph is parallel to y – axis and at a 3 unit distance from the origin.
