*(Chapter – 4) (Linear Equations in two Variables)(Exemplar Problems)*  
*(Class – IX)*

## Exercise 4.2

*Write whether the following statements are True or False? Justify your answers:*

### Question 6:

Every point on the graph of a linear equation in two variables does not represent a solution of the linear equation.

### Answer 6:

False

### Justification:

Every point on the graph on a linear equation in two variable is a solution of the equation.
